NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS (UNAUDITED)

Note 1 – Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with Form 10-Q instructions and in the opinion of management contain all adjustments, consisting of normal recurring accruals necessary to present fairly the financial position, results of operations and cash flows for the periods presented. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from these estimates. These interim financial statements should be read in conjunction with the financial statements and accompanying notes included in the Annual Report on Form 10-K for the year ended December 31, 2010 of PolyOne Corporation.

Operating results for the three-month and nine-month periods ended September 30, 2011 are not necessarily indicative of the results that may be attained in the fourth quarter of 2011 or for the year ending December 31, 2011.

Future Adoption of Accounting Standards

In May 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update No. 2011-04, “*Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*” (ASU 2011-04). ASU 2011-04 generally provides a uniform framework for fair value measurements and related disclosures between U.S. generally accepted accounting principles and International Financial Reporting Standards. Additional disclosure requirements in the update include: (1) for Level 3 fair value measurements, quantitative information about unobservable inputs used, a description of the valuation processes used by the entity, and a qualitative discussion about the sensitivity of the measurements to changes in the unobservable inputs; (2) for an entity’s use of a nonfinancial asset that is different from the asset’s highest and best use, the reason for the difference; (3) for financial instruments not measured at fair value but for which disclosure of fair value is required, the fair value hierarchy level in which the fair value measurements were determined; and (4) the disclosure of all transfers between Level 1 and Level 2 of the fair value hierarchy. ASU 2011-04 will be effective for interim and annual periods beginning on or after December 15, 2011. We will adopt the provisions of ASU 2011-04 in the first quarter of 2012, and do not believe the adoption of this update will materially impact our financial statements.

In June 2011, the FASB issued Accounting Standards Update No. 2011-05, “*Comprehensive Income (Topic 220): Presentation of Comprehensive Income*” (ASU 2011-05). ASU 2011-05 amends existing guidance by allowing only two options for presenting the components of net income and other comprehensive income: (1) in a single continuous financial statement, statement of comprehensive income or (2) in two separate but consecutive financial statements, consisting of an income statement followed by a separate statement of other comprehensive income. Also, items that are reclassified from other comprehensive income to net income must be presented on the face of the financial statements. ASU No. 2011-05 requires retrospective application, and it is effective for fiscal years beginning after December 15, 2011. We will adopt the provisions of ASU 2011-05 in the first quarter of 2012, and are currently evaluating which presentation option for the components of net income and other comprehensive income we will use.

In September 2011, the FASB issued Accounting Standards Update No. 2011-08, “*Intangibles – Goodwill and Other (Topic 350): Testing Goodwill for Impairment*” (ASU 2011-08). ASU 2011-08 updated guidance on the periodic testing of goodwill for impairment. This guidance will allow companies to assess qualitative factors to determine if it is more-likely-than-not that goodwill might be impaired and whether it is necessary to perform the two-step goodwill impairment test required under current accounting standards. This new guidance is effective for fiscal years beginning after December 15, 2011 with early adoption permitted. We are currently evaluating this guidance, but do not expect the adoption will materially impact our financial statements.

Note 2 – Change in Accounting Principle

Effective January 1, 2011, we changed our method of recognizing actuarial gains and losses for pension and other postretirement benefits for all of our defined benefit plans. Historically, we recognized actuarial gains and losses in accumulated other comprehensive income within *Shareholders' Equity* on our consolidated balance sheets on an annual basis and amortized them into our operating results over the average remaining life expectancy of the plan participants for the majority of our U.S. and foreign benefit plans and over the remaining service period of plan participants for certain non-U.S. benefit plans, to the extent such gains and losses were outside of a corridor. We have elected to immediately recognize actuarial gains and losses, after consideration of inventory capitalization, in our operating results in the year in which the gains or losses occur because it is generally preferable to accelerate the recognition of deferred gains and losses into income rather than to delay such recognition. This change will improve the transparency in our operating results by more quickly recognizing the effects of economic and interest rate trends on plan obligations, investments and assumptions. These gains and losses are generally only measured annually as of December 31 and, accordingly, will be recorded during the fourth quarter of each year. In accordance with FASB Accounting Standards Codification Topic 250, *Accounting Changes and Error Corrections*, all prior periods presented in this Quarterly Report on Form 10-Q have been adjusted to apply the new method retrospectively. The majority of our net periodic benefit cost is captured within Corporate and eliminations in our operating segment results. The impact associated with our accounting change is reflected entirely within Corporate and eliminations. The annual recognition of actuarial gains and losses will be reflected within Corporate and eliminations. The effect of the change on retained earnings as of January 1, 2010 was a reduction of \$190.6 million, with a corresponding offset to accumulated other comprehensive income.

We have presented the effects of the change in accounting principle on our consolidated financial statements for 2011 and 2010 below. We have condensed the comparative financial statements for financial statement line items that were not affected by the change in accounting principle.

Note 3 – Goodwill and Intangible Assets

The total purchase price associated with acquisitions is allocated to the fair value of assets acquired and liabilities assumed based on the fair values at the acquisition date, with excess amounts recorded as goodwill. On January 3, 2011, we acquired Uniplen Industria de Polimeros Ltda., a leading Brazilian producer of specialty engineered materials and distributor of thermoplastics. We recorded \$7.2 million of goodwill during the nine-months ended September 30, 2011 related to this acquisition. The purchase price allocation is preliminary and may require subsequent adjustment as more information about the fair value of assets becomes available.

Goodwill as of September 30, 2011 and December 31, 2010 and changes in the carrying amount of goodwill by operating segment are as follows:

Note 6 – Income Taxes

Income tax expense was \$11.7 million in the third quarter of 2011 compared to \$6.4 million in the third quarter of 2010. We recognized income tax expense of \$87.8 million for the nine months ended September 30, 2011 compared to \$17.3 million in the same period of 2010. We record our interim provision for income taxes based on our estimated annual effective tax rate as well as certain items discrete to the current period. Our interim provision, as well as our estimated annual effective tax rate, is impacted by a number of factors, including our U.S. federal and state and foreign income tax loss carryforwards and our ability to use them as well as changes to our unrealized tax benefits. Through the third quarter of 2010, we had a full valuation allowance against our U.S. deferred tax assets that we reversed in the fourth quarter of 2010, as we determined that it was more likely than not that we would realize the benefit from our remaining U.S. deferred tax assets.

We decreased existing valuation allowances against our deferred tax assets by \$0.2 million in the third quarter of 2011 and increased those same valuation allowances \$5.1 million in the third quarter of 2010. We decreased these valuation allowances by \$4.2 million and \$11.4 million during the nine months ended September 30, 2011 and 2010, respectively. These reductions are the result of generating pre-tax income.

Note 7 – Investment in Equity Affiliates

The results of operations of SunBelt Chlor-Alkali Partnership (SunBelt), a manufacturer and marketer of chlorine and caustic soda, were included in the SunBelt Joint Venture operating segment through the date of disposition of our equity interest in SunBelt. On February 28, 2011, we sold our 50% equity interest in SunBelt to Olin Corporation (Olin) for \$132.3 million in cash, the assumption by Olin of our guarantee of \$42.7 million aggregate principal amount of senior secured notes issued by SunBelt, and potential annual earn-out payments for the three fiscal years ending December 31, 2011, 2012 and 2013, if SunBelt meets certain performance targets. We recorded a pre-tax gain of \$128.2 million, net of associated transaction costs, within *Income related to equity affiliates* for the sale of our equity interest in SunBelt.

The following tables present SunBelt's summarized financial results for the periods indicated:

In February 2011, we repaid \$20 million aggregate principal amount of our 6.58% medium-term notes at maturity.

Note 11 – Sale of Accounts Receivable

Accounts receivable consists of the following:

(In millions)	September 30, 2011	December 31, 2010
Trade accounts receivable	\$ 157.5	\$ 135.4
Retained interest in securitized accounts receivable	215.0	163.2
Allowance for doubtful accounts	(4.4)	(4.1)
	<u>\$ 368.1</u>	<u>\$ 294.5</u>

Under the terms of our accounts receivable sale facility, we sell accounts receivable to PolyOne Funding Corporation (PFC) and PolyOne Funding Canada Corporation (PFCC), both wholly owned, bankruptcy-remote subsidiaries. PFC and PFCC, in turn, may sell an undivided interest up to \$175 million and \$25 million of these accounts receivable, respectively, to certain investors. The accounts receivable sale facility matures in June 2012. As of September 30, 2011 and December 31, 2010, accounts receivable totaling \$215.0 million and \$163.2 million, respectively, were sold by us to PFC and PFCC. The maximum amount of proceeds that PFC and PFCC may receive under the facility is limited to the lesser of \$200 million or 85% of the eligible domestic and Canadian accounts receivable sold. As of September 30, 2011 and December 31, 2010, neither PFC nor PFCC had sold any of their undivided interests in accounts receivable.

The accounts receivable sale facility also makes up to \$40 million available for the issuance of standby letters of credit as a sub-limit within the \$200 million limit under the facility, of which \$14.1 million was used at September 30, 2011. The level of availability under the accounts receivable sale facility is based on the prior month's total accounts receivable sold to PFC and PFCC, as reduced by outstanding letters of credit. Additionally, the amount of availability is dependent upon compliance with a fixed charge coverage ratio covenant related primarily to operating performance that is set forth in the related agreements. As of September 30, 2011, we were in compliance with these covenants. As of September 30, 2011, \$156.5 million of securitized accounts receivable were available for sale.

Note 13 – Commitments and Contingencies

We have been notified by federal and state environmental agencies and by private parties that we may be a potentially responsible party (PRP) in connection with the investigation and remediation of certain environmental waste disposal sites. While government agencies frequently assert that PRPs are jointly and severally liable at these sites, in our experience, the interim and final allocations of liability costs are generally made based on the relative contribution of waste. We believe that our potential continuing liability with respect to these sites will not have a material adverse effect on our consolidated financial position, results of operations or cash flows. In addition, we initiate corrective and preventive environmental projects of our own to ensure safe and lawful activities at our operations. We believe that compliance with current governmental regulations at all levels will not have a material adverse effect on our financial condition.

During the nine-month periods ended September 30, 2011 and 2010, we recognized \$7.9 million and \$10.2 million, respectively, of expense related to environmental activities at all of our active and inactive sites. During the nine-month periods ended September 30, 2011 and 2010, we received \$3.2 million and \$14.4 million, respectively, of proceeds from insurance recoveries. The gains associated with these recoveries are included within *Cost of sales* in our Consolidated Statement of Operations.

Based on estimates that were prepared by our environmental engineers and consultants, we had accrued \$83.4 million at September 30, 2011 and \$87.4 million at December 31, 2010 for probable future environmental expenditures related to previously contaminated sites. The accruals represent our best estimate of the remaining probable remediation costs, based upon information and technology that is currently available and our view of the most likely remedy. Depending upon the results of future testing, the ultimate remediation alternatives undertaken, changes in regulations, new information, newly discovered conditions and other factors it is reasonably possible that we could incur additional costs in excess of the amount accrued at September 30, 2011. However, such additional costs, if any, cannot be currently estimated. Our estimate of the liability may be revised as new regulations or technologies are developed or additional information is obtained.

Note 14 – Fair Value

The estimated fair values of financial instruments were principally based on market prices where such prices were available and, where unavailable, fair values were estimated based on market prices of similar instruments. Short-term foreign exchange contracts are the only asset or liability recorded at fair value on a recurring basis in our consolidated financial statements. These contracts are measured based on exchange rates at September 30, 2011 and classified as a Level 2 fair value measurement within the fair value hierarchy. These instruments have not been designated as hedges for accounting purposes.

The following table summarizes the contractual amounts of our foreign exchange contracts as of September 30, 2011. Foreign currency amounts are translated at exchange rates as of September 30, 2011. The “Buy” amounts represent the U.S. dollar equivalent of commitments to purchase currencies, and the “Sell” amounts represent the U.S. dollar equivalent of commitments to sell currencies.

We are exposed to market risk from changes in foreign currency exchange rates. Information about our risks and exposure management is included in Item 7A “Quantitative and Qualitative Disclosures about Market Risk” in our Annual Report on Form 10-K for the year ended December 31, 2010. There have been no material changes in the market risk from December 31, 2010 to September 30, 2011.

Note 15 – Comprehensive Income

The following table sets forth the reconciliation of net income to comprehensive income, adjusted for our change in accounting as described in Note 2, *Change in Accounting Principle*:

Note 16 – Acquisitions

On September 30, 2011, PolyOne entered into an Agreement and Plan of Merger (Merger Agreement) with ColorMatrix Group, Inc. (CMG) and Audax ColorMatrix Holdings, LLC under which PolyOne will acquire CMG (Acquisition). CMG is a developer and manufacturer of performance enhancing, additives for plastic products, liquid colorants, and fluoropolymer and silicone colorants, and operates globally with research and development and production facilities in North America, South America, Europe and Asia. The proposed Acquisition reflects our strategy to expand our specialty business and our international presence.

The Acquisition purchase price is \$486 million in cash. The Acquisition is being made on a cash-free, debt-free basis, and the purchase price is subject to a customary working capital adjustment. PolyOne intends to fund the purchase price with a combination of cash on hand and approximately \$300 million of new long-term debt. In connection with the Acquisition, PolyOne has received financing commitments for that new debt. The completion of the Acquisition is subject to the satisfaction or waiver of a number of customary conditions, including the expiration of waiting periods and the receipt of approvals under the Hart-Scott-Rodino Antitrust Improvements Act and the receipt of any other required regulatory consents or approvals. As the acquisition has not yet been completed, CMG's results are not reflected in the consolidated financial statements as of September 30, 2011.

Note 17 – Subsequent Events

On October 6, 2011, we entered into an agreement with E.A. Juffali & Brothers Company Limited to form a joint venture that will enable PolyOne to expand its Global Color, Additives and Inks business into the Middle East. The new joint venture will be 51% owned by PolyOne and will be based in Jeddah, Saudi Arabia, and remains subject to approvals by the government of the Kingdom of Saudi Arabia and other customary conditions to formation.

On October 11, 2011, PolyOne's Board of Directors increased the common share repurchase authorization amount by 5.25 million. The new authorization brings the total common shares available for repurchase to 10 million. Prior to October 11, 2011, the Company had 4.75 million shares available for repurchase.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Change in Accounting Principle

Effective January 1, 2011, we changed our method of recognizing actuarial gains and losses for pension and other postretirement benefits for all of our defined benefit plans. Historically, we recognized actuarial gains and losses in accumulated other comprehensive income within *Shareholders’ Equity* on our consolidated balance sheets on an annual basis and amortized them into our operating results over the average remaining life expectancy of the plan participants for the majority of our U.S. and foreign benefit plans and over the remaining service period of plan participants for certain non-U.S. benefit plans, to the extent such gains and losses were outside of a corridor. We have elected to immediately recognize actuarial gains and losses, after consideration of inventory capitalization, in our operating results in the year in which the gains or losses occur because it is generally preferable to accelerate the recognition of deferred gains and losses into income rather than to delay such recognition. These gains and losses are generally only measured annually as of December 31 and accordingly will be recorded during the fourth quarter of each year. The majority of our net periodic benefit cost is captured within Corporate and eliminations in our operating segment results. The impact associated with our accounting change is reflected entirely within Corporate and eliminations. The annual recognition of actuarial gains and losses will be reflected within Corporate and eliminations. This change will improve the transparency in our operating results by more quickly recognizing the effects of economic and interest rate trends on plan obligations, investments and assumptions. All prior periods presented in this Quarterly Report on Form 10-Q have been adjusted to apply the new method retrospectively.

Our Business

We are a premier provider of specialized polymer materials, services and solutions with operations in specialty polymer formulations, color and additive systems, thermoplastic resin distribution and specialty vinyl resins. Headquartered in Avon Lake, Ohio, we have employees at manufacturing sites and distribution facilities in North America, South America, Europe and Asia. We provide value to our customers through our ability to link our knowledge of polymers and formulation technology with our manufacturing and supply chain to provide value added solutions to designers, assemblers and processors of plastics (our customers). When used in this Quarterly Report on Form 10-Q, the terms “we,” “us,” “our” and the “Company” mean PolyOne Corporation and its subsidiaries.

On September 30, 2011, PolyOne entered into an Agreement and Plan of Merger (Merger Agreement) with ColorMatrix Group, Inc. (CMG) and Audax ColorMatrix Holdings, LLC under which PolyOne will acquire CMG (Acquisition). CMG is a developer and manufacturer of performance enhancing, additives for plastic products, liquid colorants, and fluoropolymer and silicone colorants, and operates globally with research and development and production facilities in North America, South America, Europe and Asia. The proposed Acquisition reflects our strategy to expand our specialty business and our international presence.

The Acquisition purchase price is \$486 million in cash. The Acquisition is being made on a cash-free, debt-free basis, and the purchase price is subject to a customary working capital adjustment. PolyOne intends to fund the purchase price with a combination of cash on hand and approximately \$300 million of new long-term debt. In connection with the Acquisition, PolyOne has received financing commitments for that new debt. The completion of the Acquisition is subject to the satisfaction or waiver of a number of customary conditions, including the expiration of waiting periods and the receipt of approvals under the Hart-Scott-Rodino Antitrust Improvements Act and the receipt of any other required regulatory consents or approvals. As the acquisition has not yet been completed, CMG’s results are not reflected in the consolidated financial statements as of September 30, 2011.

Sales

Sales increased 8.1% in the third quarter of 2011 compared to the third quarter of 2010, driven by a 11.0% increase from improved sales mix and increased market pricing associated with raw material inflation, 2.1% from foreign exchange gains, and 1.5% from acquisitions, which was offset by volume declines of 6.5%. Sales increased 10.9% in the nine months ended September 30, 2011 compared to the nine months ended September 30, 2010, primarily driven by a 9.4% increase from improved sales mix and increased market pricing associated with raw material inflation, 1.6% from foreign exchange gains, and 1.5% from acquisitions, which was offset by volume declines of 1.6%.

Cost of Sales

Cost of sales as a percentage of sales increased from 83.7% in the third quarter of 2010 to 84.5% in the third quarter of 2011 primarily resulting from increased fixed costs per pound due to lower production volumes. Cost of sales as a percentage of sales increased from 82.9% in the nine months ended September 30, 2010 to 83.5% in the nine months ended September 30, 2011. Impacting cost of sales in the first nine months of 2011 and 2010 were favorable insurance recoveries of \$3.2 million and \$19.1 million, respectively, related to reimbursement for previously incurred environmental remediation costs. These items resulted in a net unfavorable increase of 0.8% to cost of sales as a percentage of sales.

Selling and Administrative

Selling and administrative costs decreased by 4.2% in the three months ended September 30, 2011 compared to the same period in 2010 primarily due to lower incentive compensation expense, offset partially by increased investment in commercial resources. Selling and administrative costs increased in the nine months ended September 30, 2011 as compared to the corresponding period in 2010 principally due to increased investment in commercial resources.

Income Related to Equity Affiliates

Income related to equity affiliates is summarized as follows:

(In millions)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	Adjusted 2010	2011	Adjusted 2010
SunBelt	\$ —	\$ 9.7	\$ 133.9	\$ 17.6
BayOne	—	0.8	—	2.2
Net income	\$ —	\$ 10.5	\$ 133.9	\$ 19.8

Effective February 28, 2011, we sold our 50% equity investment in Sunbelt and recorded a pre-tax gain of \$128.2 million in the nine months ended September 30, 2011. The net gain associated with our sale of our equity investment in SunBelt is reflected within Corporate and eliminations in our segments.

Interest Expense, net

Interest expense, net increased in the third quarter and nine months ended September 30, 2011 as compared to the corresponding periods in 2010 due to lower interest income, as the Excel Polymers note receivable of \$25.6 million was repaid in the fourth quarter of 2010. Included in *Interest expense, net* for third quarter of 2011 and 2010 is interest income of \$0.1 million and \$0.7 million, respectively. Included in *Interest expense, net* for the nine months ended September 30, 2011 and 2010 is interest income of \$0.5 million and \$2.3 million, respectively.

Other Income (Expense), net

Other income (expense), net includes financing costs associated with our accounts receivable sale facility, foreign currency gains and losses and other miscellaneous items. Included in *Other income (expense), net* for the nine months ended September 30, 2011 is income of \$1.4 million associated with royalty payments from a previously owned business, while no such income was recorded in the prior-year period.

Income Tax (Expense) Benefit

Income tax expense was \$11.7 million in the third quarter of 2011 compared to \$6.4 million in the third quarter of 2010. We decreased existing valuation allowances against our deferred tax assets by \$0.2 million in the third quarter of 2011. We increased these valuation allowances by \$5.1 million during the third quarter of 2010.

Income tax expense was \$87.8 million in the nine months ended September 30, 2011 compared to \$17.3 million in the nine months ended September 30, 2010. We decreased existing valuation allowances against our deferred tax assets by \$4.2 million in the nine months ended September 30, 2011 and decreased these valuation allowances by \$11.4 million during the nine months ended September 30, 2010.

SEGMENT INFORMATION

Operating income is the primary financial measure that is reported to the chief operating decision maker for purposes of allocating resources to segments and assessing segment performance. Operating income at the segment level does not include: corporate general and administrative costs that are not allocated to segments; intersegment sales and profit eliminations; charges related to specific strategic initiatives, such as the consolidation of operations; restructuring activities, including employee separation costs resulting from personnel reduction programs, plant closure and phaseout costs; executive separation agreements; share-based compensation costs; asset and goodwill impairments; environmental remediation costs for facilities no longer owned or closed in prior years; gains and losses on the divestiture of joint ventures and equity investments; and certain other items that are not included in the measure of segment profit or loss that is reported to and reviewed by the chief operating decision maker. These costs are included in *Corporate and eliminations*.

Global Specialty Engineered Materials

Sales increased \$10.6 million, or 7.7%, in the third quarter of 2011 compared to the third quarter of 2010. Higher market pricing associated with raw material inflation favorably impacted sales by 10.8%, foreign exchange rates favorably impacted sales by 4.3%, and acquisitions increased sales by 6.4%, which was offset by volume declines of 13.8% due to a slowdown in the global economy and elimination of certain low margin customer accounts. While sales increased over the prior-year period, operating income decreased \$3.1 million in the third quarter of 2011 as compared to the third quarter of 2010 due to unfavorable mix, and an increase in selling and administrative costs primarily associated with our investment in commercial and technical resources and a bad debt expense reversal in the prior-year period.

Sales increased \$56.2 million, or 14.4%, in the nine months ended September 30, 2011 compared to the nine months ended September 30, 2010. Higher market pricing associated with raw material inflation favorably impacted sales by 13.0%, foreign exchange rates favorably impacted sales by 3.3%, and acquisitions increased sales by 6.5%, which was offset by volume declines of 8.4% due to a slowdown in the global economy. While sales increased over the prior year, operating income decreased \$0.6 million in the nine months ended September 30, 2011 as compared to the nine months ended September 30, 2010 due to unfavorable mix and increased selling and administrative costs associated with our investment in commercial and technical resources.

Global Color, Additives and Inks

Sales increased \$3.0 million, or 2.2%, in the third quarter of 2011 compared to the third quarter of 2010. Sales mix and increases in market pricing associated with raw material inflation favorably impacted sales by 13.7%. Changes in foreign exchange rates favorably impacted sales by 5.4%, and acquisitions increased sales by 1.1%. Volumes declined by 18.0% primarily associated with a slowdown in the global economy and elimination of certain low margin customer accounts. Operating income increased \$0.9 million in the third quarter of 2011 as compared to the third quarter of 2010 as the benefit of increased sales and improved mix more than offset a \$1.4 million increase in selling and administrative costs primarily associated with our investment in commercial and technical resources, offset partially by lower incentive costs.

Sales increased \$21.6 million, or 5.4%, in the nine months ended September 30, 2011 compared to the nine months ended September 30, 2010. Sales mix and increases in market pricing associated with raw material inflation favorably impacted sales by 12.9%. Changes in foreign exchange rates favorably impacted sales by 4.5%, and acquisitions increased sales by 1.0%. Volumes declined by 13.0% associated with a slowdown in the global economy and elimination of certain low margin customer accounts. Operating income increased \$4.2 million in the nine months ended September 30, 2011 as compared to the nine months ended September 30, 2010 as the benefit of increased sales and improved mix more than offset a \$6.3 million increase in selling and administrative costs primarily associated with our investment in commercial and technical resources, offset partially by lower incentive costs.

Performance Products and Solutions

Sales increased \$28.2 million, or 14.2%, in the third quarter of 2011 compared to the third quarter of 2010. Higher selling prices associated with raw material inflation and improved product mix favorably impacted sales by 14.9%. Changes in foreign exchange rates favorably impacted sales by 0.4% and were offset by a 1.1% decline in volume. Operating income decreased \$1.2 million in the third quarter of 2011 compared to the third quarter of 2010 primarily due to raw material inflation exceeding pricing actions and lower volume due to a slowdown in the U.S. economy.

Sales increased \$76.1 million, or 12.7%, in the nine months ended September 30, 2011 compared to the nine months ended September 30, 2010. Higher selling prices associated with raw material inflation and improved product mix favorably impacted sales by 7.7%. Volume increased sales by 4.7%, driven primarily by improvements in the building and construction, industrial, and wire and cable end markets. Currency exchange rates favorably impacted sales by 0.3%. Operating income increased \$4.7 million in the nine months ended September 30, 2011 compared to the nine months ended September 30, 2010 primarily due to the increase in sales and improved product mix.

PolyOne Distribution

Sales increased \$16.6 million, or 7.0%, in the third quarter of 2011 compared to the third quarter of 2010. Sales were favorably impacted by 13.7% from improved product mix and increased market pricing primarily associated with raw material inflation, while volume declines impacted sales by 6.7% due to a slowdown in the U.S. economy. Operating income increased \$1.9 million in the third quarter of 2011 compared to the third quarter of 2010 due to increased sales, improved mix and resulting margin expansion.

Sales increased \$71.8 million, or 10.3%, in the nine months ended September 30, 2011 compared to the nine months ended September 30, 2010. Sales were favorably impacted primarily by 14.2% from improved product mix and increased market pricing associated with raw material inflation, while volume declines impacted sales by 3.9% due to a slowdown in the U.S. economy and elimination of certain low margin customer accounts. Operating income increased \$11.7 million in the nine months ended September 30, 2011 compared to the nine months ended September 30, 2010 due to increased sales, improved mix and resulting margin expansion.

SunBelt Joint Venture

Income from the SunBelt Joint Venture decreased for the third quarter and nine months ended September 30, 2011 compared to the corresponding periods in 2010 as a result of the sale of our equity investment in SunBelt effective February 28, 2011.

Corporate and Eliminations

The following table breaks down Corporate and eliminations into its various components for the third quarter and nine months ended September 30, 2011 and 2010:

(In millions)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	Adjusted 2010	2011	Adjusted 2010

Total Corporate and eliminations	<u>\$ (10.2)</u>	<u>\$ (15.6)</u>	<u>\$ 99.0</u>	<u>\$ (18.4)</u>

(a) All other and eliminations is comprised of intersegment eliminations and corporate general and administrative costs that are not allocated to segments.

Liquidity and Capital Resources

(In millions)	September 30, 2011	December 31, 2010
Cash and cash equivalents	\$ 409.8	\$ 378.1
Accounts receivable sale facility availability	156.5	128.2
Liquidity	<u>\$ 566.3</u>	<u>\$ 506.3</u>

Liquidity is defined as an enterprise's ability to generate adequate amounts of cash to meet both current and future needs. These needs include paying obligations as they mature, maintaining production capacity and providing for planned growth. Capital resources are sources of funds other than those generated by operations.

In the nine months ended September 30, 2011, liquidity increased by \$60.0 million, driven by the increase in our cash balance and the increase in accounts receivable, providing additional borrowing capacity against our accounts receivable sale facility. The increase in cash of \$31.7 million includes cash proceeds of \$139.6 million from the sale of our equity investment in SunBelt and other assets, as well as cash from operating activities of \$19.2 million, offset by debt principal payments of \$20.0 million, cash of \$52.6 million paid to acquire our common shares, a net cash payment of \$21.8 million for our acquisition of Uniplen, and capital expenditures of \$32.1 million.

Cash Flows

The following describes the material components of cash flows from operating, investing and financing activities for the nine months ended September 30, 2011 and 2010.

Operating Activities – In the nine months ended September 30, 2011, net cash provided by operating activities was \$19.2 million compared to net cash provided by operating activities of \$82.4 million in the nine months ended September 30, 2010. The decrease in net cash provided by operating activities year-over-year of \$63.2 million is principally related to higher taxes paid in the first nine months of 2011, higher incentive payments made in the first nine months of 2011 related to 2010 performance, and higher insurance and legal settlements received in the prior year.

Investing Activities – Cash provided by investing activities during the nine months ended September 30, 2011 was \$85.7 million. This reflects cash proceeds of \$139.6 million from the sale of our equity investment in SunBelt and other assets, offset by our acquisition of Uniplen, net of cash acquired, for \$21.8 million, and capital expenditures of \$32.1 million. Cash used by investing activities in the nine months ended September 30, 2010 was comprised of capital expenditures of \$18.9 million, partially offset by cash proceeds of \$7.8 million associated with the sale of our investment in O’Sullivan Films and other assets.

Financing Activities – Net cash used by financing activities in the nine months ended September 30, 2011 was \$73.7 million, which includes repayment of \$20.0 million of aggregate principal amount of our 6.58% medium-term notes at maturity, \$52.6 million of cash paid to repurchase our outstanding common shares, cash dividends paid of \$7.5 million, offset by exercises of stock awards of \$6.4 million. Cash provided by financing activities during the nine months ended September 30, 2010 includes net proceeds from the issuance of our 7.375% senior notes due 2020 and the related tender offer by which \$256 million aggregate principal amount of our 8.875% senior notes were extinguished through September 30, 2010. Additionally, we repaid our \$40 million credit facility and \$20 million aggregate principal amount of our 6.52% medium-term notes. In connection with the tender offer, we paid tender premiums and other costs of \$26.3 million, and we paid \$1.4 million of costs associated with the extinguishment of the \$40 million credit facility. Proceeds from the exercise of stock options in 2010 was \$3.9 million.

Capital Resources

The following table summarizes our available and outstanding facilities as of September 30, 2011:

(In millions)	<u>Outstanding</u>	<u>Available</u>
Long-term debt, including current maturities	\$ 432.9	\$ —
Accounts receivable sale facility	—	156.5
	<u>\$ 432.9</u>	<u>\$ 156.5</u>

Our principal sources of liquidity and capital resources are our cash flows from operating activities and available funding under our accounts receivable sale facility. We expect that our ability to generate cash from our operations and other sources of liquidity and capital resources should be sufficient to support strategic acquisitions as well as our operating needs, debt service requirements, quarterly dividends and any repurchases of our common shares on a short-term and long-term basis.

The purchase price of the Acquisition is approximately \$486 million in cash, which we intend to finance with cash on hand and \$300 million of borrowing under new long-term debt for which we have received commitments.

Long-Term Debt

As of September 30, 2011, long-term debt totaled \$432.9 million, with maturities ranging from 2012 to 2020. Current maturities of long-term debt were \$22.9 million at September 30, 2011.

Aggregate maturities of long-term debt for the next five years and thereafter are: 2012 — \$22.9 million; 2013 — \$0.0 million; 2014 — \$0.0 million; 2015 — \$50.0 million; 2016 — \$0.0; and thereafter — \$360.0 million.

Each of our 7.375% senior notes due 2020, 7.500% debentures due 2015 and 8.875% senior notes due 2012 are direct, unsecured obligations and are not guaranteed by any of our subsidiaries. The indentures governing our 2012, 2015 and 2020 debentures and senior notes contain limitations on our ability to incur further debt.

As discussed above, we intend to finance \$300 million of the Acquisition purchase price with borrowing under new long-term debt for which we have received commitments. The entry into the agreement for such new long-term debt is subject to the closing of the Acquisition and satisfaction or waiver of customary conditions.

Accounts Receivable Sale Facility

As of September 30, 2011, we had receivables sale facilities outstanding in the United States and Canada totaling \$200 million. The maximum proceeds that we may receive are limited to the lesser of \$200 million or 85% of the eligible domestic and Canadian accounts receivable sold. This facility also makes up to \$40 million available for issuing standby letters of credit as a sub-limit within the \$200 million facility, of which \$14.1 million was used at September 30, 2011.

The facility requires us to maintain a minimum fixed charge coverage ratio (defined as Adjusted EBITDA less capital expenditures, divided by the sum of interest expense and scheduled debt repayments for the next four quarters) of at least 1 to 1 when average excess availability under the facility is \$40 million or less. As of September 30, 2011, the average excess availability under the facility was greater than \$40 million. Additionally, the fixed charge coverage ratio exceeded 1 to 1.

The receivables sale facilities expire in June 2012. As of September 30, 2011 we have received commitments to replace the receivables sale facilities with a new five-year asset-based revolving credit facility. The entry into the new revolving credit facility is subject to the satisfaction or waivers of customary conditions.

Contractual Obligations

We have future obligations under various contracts relating to debt and interest payments, operating leases, standby letters of credit, pension and postretirement benefit plans and purchase obligations. During the nine months ended September 30, 2011, there were no significant changes to these obligations as reported in our Annual Report on Form 10-K for the year ended December 31, 2010, except as it relates to the scheduled repayment of debt, as previously discussed.

CAUTIONARY NOTE ON FORWARD-LOOKING STATEMENTS

In this quarterly report on Form 10-Q, statements that are not reported financial results or other historical information are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements give current expectations or forecasts of future events and are not guarantees of future performance. They are based on management’s expectations that involve a number of business risks and uncertainties, any of which could cause actual results to differ materially from those expressed in or implied by the forward-looking statements. They use words such as “will,” “anticipate,” “estimate,” “expect,” “project,” “intend,” “plan,” “believe” and other words and terms of similar meaning in connection with any discussion of future operating or financial performance and/or sales. In particular, these include statements relating to future actions; prospective changes in raw material costs, product pricing or product demand; future performance; results of current and anticipated market conditions and market strategies; sales efforts; expenses; the outcome of contingencies such as legal proceedings; and financial results. Factors that could cause actual results to differ materially from those implied by these forward-looking statements include, but are not limited to:

- the effect on foreign operations of currency fluctuations, tariffs and other political, economic and regulatory risks;
- changes in polymer consumption growth rates where PolyOne conducts business;
- changes in global industry capacity or in the rate at which anticipated changes in industry capacity come online in the polyvinyl chloride (PVC), vinyl chloride monomer (VCM) or other industries in which PolyOne participates;
- fluctuations in raw material prices, quality and supply and in energy prices and supply;
- production outages or material costs associated with scheduled or unscheduled maintenance programs;
- unanticipated developments that could occur with respect to contingencies such as litigation and environmental matters, including any developments that would require any increase in our costs and/or reserves for such contingencies;
- an inability to achieve or delays in achieving or achievement of less than the anticipated financial benefit from initiatives related to working capital reductions, cost reductions and employee productivity goals and our new global organization structure;
- an inability to raise or sustain prices for products or services;
- an inability to maintain appropriate relations with unions and employees;
- the speed and extent of an economic recovery, including the recovery of the housing market;
- the financial condition of our customers, including the ability of customers (especially those that may be highly leveraged and those with inadequate liquidity) to maintain their credit availability;
- disruptions, uncertainty or volatility in the credit markets that may limit our access to capital;
- the amount and timing of repurchases of PolyOne common shares;
- our ability to pay regular quarterly cash dividends and the amounts and timing of any future dividends;
- other factors affecting our business beyond our control, including, without limitation, changes in the general economy, changes in interest rates and changes in the rate of inflation;
- the possibility that we will be unable to successfully complete potential acquisitions, including without limitation, the pending acquisition of CMG;
- the ability to successfully integrate acquired companies into our operations, retain the management teams of acquired companies, and retain acquired company relationships with customers, including without limitation, CMG, if it is successfully acquired;
- the ability to achieve the expected results of any acquisitions, including the acquisitions being accretive, including, without limitation, the pending acquisition of CMG, and
- other factors described in our Annual Report on Form 10-K for the year ended December 31, 2010 under Item 1A, “Risk Factors.”

We cannot guarantee that any forward-looking statement will be realized, although we believe we have been prudent in our plans and assumptions. Achievement of future results is subject to risks, uncertainties and inaccurate assumptions. Should known or unknown risks or uncertainties materialize, or should underlying assumptions prove inaccurate, actual results could vary materially from those anticipated, estimated or projected. Investors should bear this in mind as they consider forward-looking statements. We undertake no obligation to publicly update forward-looking statements, whether as a result of new information, future events or otherwise, except as otherwise required by law. You are advised,

however, to consult any further disclosures we make on related subjects in our reports on Forms 10-Q, 8-K and 10-K furnished to the SEC. You should understand that it is not possible to predict or identify all risk factors. Consequently, you should not consider any such list to be a complete set of all potential risks or uncertainties.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

We are exposed to certain market risks as part of our ongoing business operations, including risks from foreign currency exchange rates that could impact our financial condition, results of operations and cash flows. We manage our exposure to these and other market risks through regular operating and financing activities, including the use of derivative financial instruments. We intend to use these derivative financial instruments as risk management tools and not for speculative investment purposes.

Foreign currency exposure — We enter into intercompany lending transactions that are denominated in various foreign currencies and are subject to financial exposure from foreign exchange rate movement from the date a loan is recorded to the date it is settled or revalued. To mitigate this risk, we enter into foreign exchange contracts, which had a fair value of (\$0.4) million at September 30, 2011. Gains and losses on these contracts generally offset gains and losses on the assets and liabilities being hedged.

We face translation risks related to the changes in foreign currency exchange rates. Amounts invested in our foreign operations are translated into U.S. dollars at the exchange rates in effect at the balance sheet date. The resulting translation adjustments are recorded as a component of *Accumulated other comprehensive income (loss)* in the Shareholders' equity section of the accompanying consolidated balance sheets. Net sales and expenses in our foreign operations' foreign currencies are translated into varying amounts of U.S. dollars depending upon whether the U.S. dollar weakens or strengthens against other currencies. Therefore, changes in exchange rates may either positively or negatively affect our net sales and expenses from foreign operations as expressed in U.S. dollars.

Item 4. Controls and Procedures

Disclosure controls and procedures

PolyOne's management, under the supervision of and with the participation of its Chief Executive Officer and its Chief Financial Officer, has evaluated the effectiveness of the design and operation of PolyOne's disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as of the end of the period covered by this quarterly report. Based upon this evaluation, PolyOne's Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this quarterly report, its disclosure controls and procedures were effective.

Changes in internal control over financial reporting

There were no changes in PolyOne's internal control over financial reporting during the quarter ended September 30, 2011 that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting.

Part II – Other Information

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The table below sets forth information regarding repurchases of our common shares during the period indicated:

Period	Total Number of Shares Purchased	Weighted Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Maximum Number of Shares that May Yet be Purchased Under the Program (1)
July 1 to July 31	—	—	—	6,750,000
August 1 to August 31	1,750,000	\$ 12.43	1,750,000	5,000,000
September 1 to September 30	250,000	\$ 11.45	250,000	4,750,000
Total	<u>2,000,000</u>	<u>\$ 12.31</u>	<u>2,000,000</u>	

- (1) On August 18, 2008, our Board of Directors approved a stock repurchase program authorizing us, depending upon market conditions and other factors, to repurchase up to 10.0 million common shares, in the open market or in privately negotiated transactions.

On October 11, 2011, our Board of Directors increased the authorization by 5.25 million common shares, making the maximum number of shares that may yet to be purchased under the program 10.0 million common shares.

CERTIFICATION

I, Robert M. Patterson, certify that:

1. I have reviewed this quarterly report on Form 10-Q of PolyOne Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
